RAM MOUNTING SYSTEM COMPONENTS

RAM Mounts® are made to withstand up to 50 Gs of force and the frequent vibrations found in the air without sacrificing visibility and access. The innovative ball-and-socket design utilizes a patented rubber-coated ball providing superior hold and vibration reduction. Designed to be impact resistant and adapt to any situation, RAM Mounts are made in the U.S.A. and most products are backed with a lifetime warranty. Components use standard 1/4" NPT threads. The flex arms are made of spring steel with a PVC covering and are bendable. At the top, use a single ball, a single socket or a double ball depending on application. Easy to install, mount and position handhelds. Units allow you to reposition or remove your electronics for safe keeping.

	Part No.	Was	NOW
--	----------	-----	-----

RAM-B-200-1. Single Socket for 1" ball, w/ 1/4" NPT end
